Dear Bob:

Dr. Seligman informs me that you have quite some data on coumarin contents in the filler of American cigarettes. I am interested in these and would acknowledge receiving these data.

Please mention which part of this information will have to be kept confidential, since I intend to transmit some results to Dr. Weber in Hamburg who is collecting all information about this tobacco additive.

According to the latest news, there seems to be no doubt that the use of coumarin as a food and tobacco additive will eventually be prohibited in Germany.

With best personal regards,

C68-00164

Sincerely

Max
